Marsh

Cyber risk management solutions for SMEs

In today's digital world, managing cyber risks is vital for all businesses. Marsh has partnered with a top UK cybersecurity expert to help you protect your organisation.

Our services include assessments, training, consultancy, and simulations designed to strengthen your security and support your ongoing progress.

Penetration testing

Penetration testing is one of the best ways to stay ahead of evolving cyber threats and prevent data breaches. We offer a range of penetration tests, available as one-offs to spot-check security or on a recurring basis as part of your ongoing cybersecurity strategy.

Cybersecurity assessment

A comprehensive audit of the information and cybersecurity measures in place across your business. This helps you understand your current security posture and create a roadmap to improve.

Cybersecurity training and qualifications

We offer various cybersecurity training and qualification options to suit your business needs, including:

Cyber Essentials certification: A government-backed scheme that helps protect your organisation and includes free cyber insurance if your entire company is certified.

Flexible training formats: Choose from virtual or onsite sessions to fit your team's preferences.

eLearning courses: Convenient, self-paced learning for busy schedules.

Specialised GDPR (General Data Protection Regulation) training: Keeps your team compliant and prepared for data protection requirements.

Access expert consultancy and guidance

Virtual chief information security officer (CISO)

Seeking expert information security and risk management guidance without increasing headcount? A virtual CISO offers dedicated consultancy tailored to your organisation. They immerse themselves in understanding your current operations and future goals, crafting a strategic roadmap to ensure your security and business success.

Fixed and bespoke packages are available for businesses of all sizes and sectors.

Other essential security services available on retainer include:

- Security information and event management (SIEM) and security operations centre (SOC) services
- Data protection officer (DPO) and GDPR consultancy
- ISO 27001 and ISO 9001 consultancy
- Digital Operational Resilience Act (DORA) consultancy
- SOC 2 consultancy

Real-world threat simulations

Identify vulnerabilities in your networks, systems, buildings, people, and processes using simulations of real-world threats. Our teams employ genuine tactics that criminals would use to test your defences and response capabilities. These exercises can be carried out covertly or fully transparently, with live feedback designed for collaboration and knowledge sharing.

These are just some of the services we offer to help you strengthen your cyber resilience and protect your business.
